Foreword

As Chair of the Moray Police and Fire & Rescue Service Committee, I am pleased to present the Moray Local Fire and Rescue Plan for 2026. This Plan sets out the priorities that will shape the delivery of local fire and rescue services over the next three years and reflects our continued commitment to keeping people and communities across Moray safe.

Over the past year, Moray has faced some of the most significant and demanding wildfire incidents ever experienced in this area, including the major wildfire which spread across Dava Moor and the large-scale forest fire at Culbin. These incidents highlight the increasing risks posed by extreme weather and changing environmental conditions, and also demonstrate the remarkable professionalism, resilience and bravery of firefighters and partner agencies working in exceptionally difficult circumstances.

The challenges facing the Scottish Fire and Rescue Service continue to evolve and the importance of prevention and preparedness has never been greater. Alongside responding to emergencies, the Service plays a vital role in supporting vulnerable people, working with partners and helping communities reduce risk before incidents occur.

This Plan reflects a strong commitment to partnership working, early intervention and community engagement. By continuing to work closely with local organisations and communities across Moray, we can ensure resources are targeted where they are needed most and that local services are prepared to respond effectively to the risks and challenges facing our communities in the years ahead.

Councillor Peter Bloomfield

Chair

***Moray Police and Fire &
Rescue Service Committee***

Introduction

As the Local Senior Officer for Moray, it is my responsibility to ensure that the Scottish Fire and Rescue Service (SFRS) continues to deliver a professional, effective and community-focused service that meets the needs of the people, businesses and visitors across our area.

Moray is a diverse region, encompassing rural communities, coastal settlements, and growing towns. This presents a unique and varied risk profile, including challenges associated with remoteness, severe weather, transport networks, agricultural activity and an ageing population. Our Local Fire and Rescue Plan reflects these risks and sets out how we will work in partnership to prevent harm, protect communities and respond effectively to emergencies.

This Plan aligns with the strategic priorities of the SFRS and has been developed in consultation with our partners and stakeholders, ensuring it reflects local needs and priorities. Prevention, protection and response remain at the heart of everything we do. By working collaboratively with community planning partners, local authorities, emergency services and the third sector, we aim to build safer and more resilient communities.

Our firefighters and staff, both Wholetime and On Call, remain committed to delivering a high standard of service across Moray. Through continuous improvement, training and engagement, we will ensure we are well prepared to meet current and emerging risks.

This Plan outlines our local priorities and the actions we will take to deliver them. I am confident that, through strong partnership working and community engagement, we will continue to make Moray a safer place to live, work and visit.

Serge Kabamba

Local Senior Officer

Aberdeen City, Aberdeenshire and Moray

Scottish Fire and Rescue Service

National Context and Challenges

Scottish Ministers set out their specific expectations for the Scottish Fire and Rescue Service (SFRS) in the [Fire and Rescue Framework for Scotland 2022](#). This Framework provides SFRS with seven strategic priorities and objectives, together with guidance on how the delivery of our functions should contribute to the Scottish Government's Purpose.

The Framework also defines the SFRS purpose as:

'To work in partnership with communities and with others in the public, private and third sectors on prevention, protection and response to improve the safety and wellbeing of people throughout Scotland.'

The SFRS Strategy 2025-28 has been designed to have regard to these national expectations. Set against a complex and evolving backdrop, our Strategy supports delivery of our Purpose, Mission and Vision.

To achieve our ambitions, we have identified five strategic objectives and outcomes. Each objective holds equal value in driving our Strategy forward. As a collective, they define our overall direction and will be central to how we plan our activities and our budget over the next three years.

OBJECTIVE	OUTCOME
Safer Communities through Prevention	Through our work with communities and other organisations, the safety and wellbeing of the people of Scotland improves.
Safe and Effective Response	We are an effective and trusted Fire and Rescue Service where our communities and people are safe.
Investing in our People	Our people feel valued and are supported by a culture that embraces diversity and inclusion, empowerment and accountability.
Improving Performance	Our organisational performance, productivity and resilience continually improves.
Innovation and Investment	We are more innovative and achieve sustained investment in our technology, equipment, estate and fleet, making us more effective and efficient.

This Plan is a statutory Local Fire and Rescue Plan. It sets local direction to meet the strategic objectives and outcomes outlined above; and supports delivery of the SFRS Prevention Strategy. It demonstrates how we will contribute to Community Planning Partnerships (CPPs) within the Local Authority area.

National Challenges

Over the next three years, the SFRS will operate within a challenging and rapidly evolving national context. This Local Fire and Rescue Plan is developed against a backdrop of sustained financial pressure, changing community risk, and the need for organisational change to ensure services remain effective, sustainable and focused on prevention.

SFRS continues to face real-terms financial constraints despite funding uplifts, with rising costs, inflationary pressures and a substantial backlog in capital investment. Ageing fire stations, fleet and operational systems require modernisation, while the Service must also deliver recurring savings. This national financial environment directly shapes decisions about service delivery models, asset rationalisation and the prioritisation of resources at local level.

Workforce capacity remains a critical national challenge. Recruitment, retention and availability, particularly within the retained duty system are under increasing pressure, especially in rural and remote communities. Supporting staff wellbeing, skills, training and leadership capacity is essential to maintaining safe and reliable emergency response while adapting to new and emerging risks.

The risk profile across Scotland is changing. While accidental dwelling fires continue to decline, demand is increasing from climate-related incidents such as flooding, wildfires and extreme weather events. These incidents are often prolonged, complex and resource-intensive, requiring increased resilience, specialist capability and effective multi-agency coordination. At the same time, demographic change, health inequalities and housing conditions continue to drive vulnerability and risk within communities.

Prevention remains at the core of SFRS's national and local approach. Reducing harm, protecting vulnerable people and building community resilience are central to managing demand and delivering long-term public value. This requires strong collaboration with partners across health, social care, local government and the third sector.

The SFRS Prevention Strategy 2025–2028 sets out a clear ambition to reduce harm, protect firefighters and communities, and manage demand through a universal prevention offer delivered proportionately according to risk, vulnerability and inequality. Local Fire and Rescue Plans are a key mechanism for delivering the Prevention Strategy at local level. They translate national prevention priorities into locally tailored actions, ensuring that community safety engagement, protection and preparedness activity is informed by local risk profiles, partnership intelligence and community need.

In response to some of the challenges we face, SFRS is progressing its Strategic Service Review Programme (SSRP). A priority for the next three-years, SSRP will focus on providing firefighters with modern facilities, fleet and equipment to enhance community and firefighter safety, how and where we deliver our services from, and ensuring our corporate services are as efficient and effective as possible. These changes are necessary to ensure resources are targeted where risk is greatest, while maintaining public confidence and local accountability.

This Local Fire and Rescue Plan translates this national context into local priorities, reflecting the specific risks, needs and characteristics of communities. It sets out how SFRS will work with partners to deliver prevention, protection and response activities in a way that supports safer communities while contributing to the Service's wider strategic aims for Scotland.

By focusing on prevention, collaboration and early intervention, this Plan supports public service reform and delivers better outcomes for our local communities.

Local Context

Moray lies in the North-East of Scotland between Inverness in the Highlands to the West and Aberdeenshire to the East. It sits along the south shore of the Moray Firth and extending further south into the Cairngorm Mountains and National Park. Its area of 2,238 square kilometres makes it the eighth largest council area in Scotland. The area is mostly rural, comprising 70% open countryside and a further 25% woodland. However, in terms of its population, it ranks 24th out of 32 with a population of 95,010 (National Records of Scotland). Just over half the population live in the five main towns of Elgin, Forres, Buckie, Lossiemouth and Keith.

Moray is a diverse area of rich agricultural landscape and is renowned for whisky and scenic coastline. There are a significant number of listed buildings, conservation areas and other culture and artistic assets within the area. There are 68 designated protected areas either wholly or partially within Moray. The age profile of Moray varies from the Scottish average. In terms of overall size, the 45 to 64 age group was the largest in 2024, with a population of 26,735. In contrast, the 16 to 24 age group was the smallest, with a population of 8,942. Between 2022 and 2032, the 0 to 15 age group is projected to see the largest percentage decrease (-14.1%) and the 75 and over age group is projected to see the largest percentage increase (+25.9%). In terms of size, however, 45 to 64 is projected to remain the largest age group.

The Moray economy is still largely based on its natural resources with focus on agriculture, fishing, forestry, food products, whisky and tourism. The largest employer is the Ministry of Defence with bases at Kinloss and Lossiemouth.

Statistical information on the population, local economy, housing and employment land development in Moray and its main towns can be obtained from the “National Records of Scotland” website at:

<https://www.nrscotland.gov.uk/statistics-and-data/council-area-profiles/moray/>

The SFRS participates as a statutory partner within community planning in Moray and this extends to and includes our involvement in the Local Outcome Improvement Plan, Community Planning Partnership, Public Protection Partnership, Police, Fire and Rescue Services Committee, and Area Forums as examples. In addition, and to support wider community safety the SFRS is a member of Grampian Local Resilience Partnership (GLRP).

Moray CPP Board formally agreed four priorities for Moray:

- Growing, diverse and sustainable economy
- Building a better future for our children and young people in Moray
- Empowering and connecting communities
- Changing our relationship with alcohol.

The SFRS locally will proactively support the above priorities through deployment of necessary resources as aligned to the priorities detailed within this Plan.

Moray is served by 12 Community Fire and Rescue stations, 1 permanently staffed at Elgin, a volunteer station at Gordonstoun School and the remainder on a part-time basis by our cadre of On Call duty system staff.

Performance Scrutiny

The Moray Local Fire and Rescue Plan will be subject to robust governance and scrutiny arrangements through Moray Council's Police and Fire and Rescue Services Committee.

The Local Senior Officer, or nominated deputy, will provide regular performance updates to the Committee outlining progress against priorities, emerging risks, and key performance indicators. These reports will include both quantitative and qualitative measures, benchmarking against previous years and national trends where appropriate.

Scrutiny will be supported through:

- Quarterly and annual performance reports
- Continuous monitoring of operational activity, prevention and protection work
- Engagement with elected members, Area Forums and Community Councils
- Alignment with SFRS national performance frameworks

Local Group and Station Managers will also maintain engagement with communities and partners, ensuring local intelligence informs ongoing review and delivery.

This approach ensures transparency, accountability and continuous improvement in delivering outcomes for the communities of Moray.

Local Priorities

The following priorities have been identified through:

- Local risk analysis
- Operational incident data
- Moray Community Planning Board priorities
- Local Outcome Improvement Plan (LOIP) outcomes
- National SFRS strategic direction

Priority 1.	Risk Management and Safe and Effective Response
Priority 2.	Domestic Fire Safety and Unintentional Harm in the Home
Priority 3.	Deliberate Fire Setting
Priority 4.	Non-Domestic Fire Safety
Priority 5.	Unwanted Fire Alarm Signals
Priority 6.	Non-Fire Emergencies and Responding to Climate Change
Priority 7.	Community Resilience

	SFRS Local Area Plan Priorities						
LOIP Outcomes	Priority 1	Priority 2	Priority 3	Priority 4	Priority 5	Priority 6	Priority 7
Outcome 1 Raising aspirations	✓	✓	✓	✓		✓	✓
Outcome 2 Building a better future for our children and young people in Moray		✓	✓	✓		✓	✓
Outcome 3 Empowering and connecting communities			✓	✓		✓	✓
Outcome 4 Developing, diverse and sustainable economy	✓	✓			✓	✓	✓
Outcome 5 Improving the Wellbeing of our population	✓	✓		✓		✓	✓

Local Priorities

1. Risk Management and Safe and Effective Response

Background:

The SFRS has a statutory duty to reduce the risks to our communities and to make certain that they receive the best possible service. It is essential our firefighters possess the skills, knowledge and expertise to respond to incidents which, by their nature, can be varied in both their type and complexity.

The SFRS has a duty to prepare for and respond to major emergencies. The scope of such preparations may include responding to adverse weather events, natural disasters, pandemics, chemical incidents or major transport incidents. The threat of terrorism also compels the SFRS to ensure it can also respond alongside other partner agencies should such an event occur.

Moray presents a complex risk profile including rurality, road networks, military infrastructure, heritage sites and industrial risks such as distilleries. Emergency response must remain adaptable to ensure the right resources are available at the right time.

It is essential that we have enough staff with the right skills in the right place at the right time to deliver our services when communities need them.

We will achieve it by:

- Ensuring our staff are developed and equipment is fit for purpose to meet our current and future risk profile and adaptable to changing circumstances.
- Ensuring all known local risk information is obtained, communicated and tested.
- Working locally with partner organisations to ensure effective emergency response plans are developed for identified local risks including our own local business continuity plans.
- Fulfilling our statutory duties in relation to the Civil Contingencies Act (2004) by way of our contribution to Grampian Local Resilience Partnership and North of Scotland Regional Resilience Partnership.
- Maintaining risk-based crewing and resource models.
- Enhancing training and exercising programmes.
- Improving availability across wholetime and On Call duty system.

Performance Indicators:

- % of personnel in currency against Training for Operational Competence Programme
- % of personnel in currency against National Training Standards
- Appliance Availability
- Station Establishment Levels
- Response times to incidents
- Operational assurance outcomes

Local Prevention Activity:

Community Safety Engagement:

- Site-specific risk planning.
- Multi-agency exercising.

Protection:

- Fire Investigation involvement for fire incidents to ensure essential learning is captured and cascaded to crews.

Preparedness:

- Robust programme of hydrant planning maintenance and inspections
- Effective business continuity planning
- Identify opportunities to build community resilience

Expected Outcomes:

- Safe and effective emergency response
- Reduced impact of emergencies on communities

Delivering Against Strategic Objective: Safer Communities through Prevention, Safe and Effective Response, Investing in our People, Improving Performance, Innovation and Investment.

2. Domestic Fire Safety and Unintentional Harm in the Home

Background:

Although accidental dwelling fires have reduced nationally by 26% over the last 10 years, local analysis of accidental dwelling fire data across the local authority area shows only minor year-on-year variation with no sustained downward trend. Despite ongoing prevention activity, cooking-related fires continue to represent the single largest cause of accidental dwelling fires, consistently accounting for above 50% of incidents. Risk is disproportionately higher among vulnerable groups, including older adults, single occupants, those affected by smoking, mobility issues, alcohol dependency and the use of medication.

Given many of these individuals are known to partner agencies, there is a clear strategic need to strengthen referral pathways and improve data sharing. In response, a more targeted prevention approach will be prioritised, focusing on high-risk individuals and locations through enhanced safe and well activity, strengthened partnership working, and behavioural change campaigns addressing unattended cooking and lifestyle factors. This coordinated approach aims to deliver a sustained reduction in cooking-related fires and improve community safety outcomes across the area.

Accidental dwelling fires remain a key risk, with cooking continuing to be the leading cause. Vulnerability is linked to age, health inequalities and living conditions.

We will achieve it by:

- Targeted Home Fire Safety Visits (HFSV's), focusing on high-risk behaviours (e.g. cooking, smoking and alcohol and drugs use).
- Working with partners to refine our referral process and increase the number of vulnerable people identified.
- Targeted media messages using both traditional and social media to tailor messages to identified risk.
- Focusing on high-risk behaviours (e.g. cooking, smoking, alcohol use).

Performance Indicators:

- Number of Accidental Dwelling Fires
- Number of Accidental Dwelling Fire Casualties and Fatalities
- % of Accidental Dwelling Fires attributed to Cooking
- Number of Home Fire Safety Visits Completed
- Number of initiatives targeting accidental dwelling fires.

Local Prevention Activity:

Community Safety Engagement:

- Delivery of Home Fire Safety Visits.
- Train and support staff and volunteers to ensure SFRS fulfil its safeguarding duties, engaging with partners to ensure those most at risk are identified and support is provided.

- Provide resources, training and invest in our staff to deliver interventions in relation to accidental dwelling fires. This includes using online platforms and new technologies to deliver impactful messages and affect behavioural change.
- Utilise incident data, knowledge and partner intelligence to identify those most at risk to direct resources and evaluate resulting outputs and outcomes.
- Targeted campaigns in high-risk areas.

Protection:

- Fire Investigation support for fire related incidents ensuring essential learning is captured and cascaded to crews.
- Advice to housing providers, care settings, owners and occupiers.

Expected Outcomes:

- Ongoing reduction in the number of accidental dwelling fires compared to the three-year rolling average.
- Ongoing reduction in the number of accidental dwelling fire casualties and fatalities compared to the three-year rolling average.
- Improved safety for vulnerable households.
- Strong partnership approach to reducing harm in the home.

Delivering Against Strategic Objective: Safer Communities through Prevention, Safe and Effective Response, Improving Performance, Innovation and Investment.

3. Deliberate Fire Setting

Background:

Deliberate fire setting accounts for a significant number of operational incidents within Moray and takes various forms. Whilst a small proportion involves occupied buildings, vehicles and outdoor structures (primary fires), the majority of deliberate fires are classed as secondary fires (grass, bushes, refuse etc.) and on most occasions, occur in outdoor locations.

In Moray evidence reflects that deliberate fires can be closely linked to antisocial behaviour. Youth engagement is a key area of work in relation to this priority, and we will continue to run our youth engagement initiatives and develop these further to create maximum impact.

Dealing with instances of deliberate fire setting can divert fire and rescue resources from other meaningful activities.

We will achieve it by:

- Delivery of thematic and multi-agency action plans tailored to meet local need.
- Using SFRS programmes, such as the Fire Skills Scheme, to raise awareness of risk and foster a culture of safety within young people.
- Ensuring that our staff and volunteers are appropriately trained to positively engage with children and young people to improve their awareness of risk and build their resilience.
- Delivering targeted interventions that enhance young people's understanding of hazards and risks associated with deliberate fire setting. Engagements should be meaningful and support behavioural change.
- Increasing community fire safety education in targeted areas where most deliberate fires occur.
- Continuing work with our partners to develop joint risk reduction strategies to further mitigate the impact of deliberate fires and the economic and social cost to the community.

Performance Indicators:

- Number of Deliberate Primary and Secondary Fires.
- Number of FireSkills Courses delivered.
- Number of Fire Safety Support and Education interventions delivered.

Local Prevention Activity:

Community Safety Engagement:

- Delivery of FireSkills programme.
- Delivery of Fire Safety Support and Education Interventions.
- School Engagement Sessions.
- Media messaging highlighting the hazards and consequences of deliberate fire setting.

Protection:

- We will use incident data, partner and open data, and utilise technological solutions to target resources. This includes creating risk profiles utilising factors that are known to increase the risk of harm from fire and a Risk Based Inspection Programme to predict the most influential factors that increase the risk of fire and the consequential impact.

Preparedness:

- We will engage in a programme of community risk management supported by targeted initiatives and seasonal thematic campaigns.

Expected Outcomes:

- Reduction in the number of deliberate fires
- Reduction in anti-social behaviour
- Communities that feel safer
- Reducing the negative impact on local communities
- Diverting young people away from anti-social behaviour to positive destinations by encouraging them to be good citizens, through initiatives such as FireSkills.

Delivering Against Strategic Objective: Safer Communities through Prevention, Safe and Effective Response, Improving Performance, Innovation and Investment.

4. Non-Domestic Fire Safety

Background:

The SFRS has a statutory duty to promote fire safety under Part 2 (Section 8) of the Fire (Scotland) Act 2005 (as amended) to include provision of information aimed at preventing fire and reducing fire deaths and injuries, restricting fire spread and advising on means of escape from buildings. All such workplaces and business premises involved in fire are classed as Non-Domestic Fires.

Sleeping risks are seen as a particularly high fire risk since most fatal fires occur at night when people are less vigilant and at their most vulnerable. Residential care homes and Houses in Multiple Occupation make up the greatest proportion of these risks within the Moray area.

Accidental primary and secondary fires include fires involving agricultural land, forestry and moorland also present a unique risk to the Moray area as it contributes substantially to the local environment by providing economic benefit through tourism, employment and industry. It is a key role for the SFRS locally to promote fire safety to landowners and the farming community and in doing so contribute to making Moray a safe place to live, work and visit.

We will achieve it by:

- Continuing the fire safety audit programme for high-risk premises.
- Engaging with the business community to highlight their responsibilities for compliance with fire legislation.
- Identifying trends in building types and conducting thematic fire safety audits.
- Contributing and engagement with recognised national and local wildfire groups, including co-chairing the Moray Wildfire Summit.

Performance Indicators:

- All Non-Domestic fires (Relevant Premises).
- Extent of Damage in Non-Domestic Fires.
- All Accidental primary and secondary fires.

Local Prevention Activity:

Community Safety Engagement:

- Thematic action plans to target Accidental Primary and Secondary Fires, aligned to the needs of the Moray Area.
- Engagement sessions for Owners and Occupiers of Relevant Premises to promote Fire Safety and Best Practices.

Protection:

- Delivery of Fire Safety Audit Programme aligned to risk within Moray.
- Thematic Audits in line with any identified local or national trends.

Expected Outcomes:

- Assisting the private and business sector in understanding their fire safety responsibilities.
- Ensuring that buildings are safer, people feel protected and the opportunities for acts of deliberate or wilful fire raising are reduced.
- Supporting and protecting business continuity and employment within Moray.
- Contribute to protecting our natural heritage, biodiversity and environment.

Delivering Against Strategic Objective: Safer Communities through Prevention, Safe and Effective Response, Investing in our People, Improving Performance, Innovation and Investment.

5. Unwanted Fire Alarm Signals

Background:

The SFRS aim is to continue to reduce the impact of unwanted fire signals generated by automatic detection systems on service delivery, business and commerce. By doing this we aim to improve the safety of Moray communities and businesses by ensuring that our service is more readily available for genuine emergencies. An Unwanted Fire Alarm Signal (UFAS) is defined as a signal transmitted by an Automatic Fire Detection (AFD) system reporting a fire where, upon arrival of the fire service, it is found that a fire has not occurred. UFAS are entirely avoidable through good system design, management practice, procedure, maintenance and the appropriate use of space within buildings.

Key building types will be identified and monitored closely by our Fire Safety Enforcement staff with supportive interventions offered to duty holders and responsible persons.

The incidents attended by local staff not only impact on local business but also on our part-time retained duty system firefighter's primary employment.

All operational response crews provide advice to occupiers on every occasion that we attend a UFAS incident. Our Fire Safety Enforcement Staff monitor UFAS calls and take appropriate action at the various stages as stipulated in SFRS policy.

We will achieve it by:

- Identifying premises with high UFAS activity levels to determine if they comply with the Fire (Scotland) Act 2005 and have appropriate fire safety management procedures in place.
- Engaging with owners and occupiers to provide necessary support, advice and guidance for developing suitable action plans for UFAS reduction.
- Robust call management and implementation of service policy for UFAS.
- Educating our frontline emergency response staff to identify problems, support responsible persons and provide feedback to our fire safety enforcement department.

Performance Indicators:

- Number of UFAS Incidents.

Local Prevention Activity:

Community Safety Engagement:

Protection:

- Engagement with owners and occupiers of relevant premises on how to reduce Unwanted Fire Alarm Signals.

Preparedness:

- Crews will undertake operational risk information gathering and familiarisation on identified risks.

Expected Outcomes:

- Reduce the unnecessary demand and impact on the public and business sector through lost working time including employers releasing On-call staff to respond to such calls.
- Reduce the road risk to staff and wider community.
- Reduce SFRS' carbon footprint through less vehicle movements.
- Reduce the unnecessary cost of fire and rescue service response.

Delivering Against Strategic Objective: Safer Communities through Prevention, Safe and Effective Response, Improving Performance, Innovation and Investment.

6. Non-Fire Emergencies and Responding to Climate Change

Background:

A core part of SFRS's activity locally is responding to emergencies such as Road Traffic Collisions (RTCs), co-response to medical emergencies and flooding, as examples. Firefighters are trained to a high standard and have at their disposal the most modern equipment for the rescue of persons in traumatic situations.

The SFRS has a crucial role at a local level in contributing to the wider road safety agenda, as statistically fire and rescue operational activity continues to be an area of concern within Moray for the SFRS, local and national statistics identify that the most at risk group is young male drivers.

Moray has experienced significant wildfires and flooding events in recent years. The SFRS has a duty to respond to and support communities in recovering from these incidents. We have implemented an improvement of strategically placed wildfire assets across Scotland including a dedicated unit in Moray. The development of our local water rescue teams strategically located across the area has significantly improved emergency response and public safety. Demand for SFRS response to RTCs, wildfires, flooding and severe weather is increasing. Climate change is expected to further increase frequency and severity of such events.

We will achieve it by:

- Continuing to contribute to Moray Community Planning initiatives
- Supporting the priorities of the Road Safety North East Strategic Partnership Group, the SFRS locally will contribute to evidence based and partnership initiatives.
- Contributing to the development of local flood action plans and supporting local community initiatives.
- Contributing to resilience with the Grampian Local Resilience Partnership.
- Staff development and allocation of resource to meet local and national need.
- Supporting the Moray Wildfire Summit.

Performance Indicators:

- Number of all Non-Fire Emergencies.
- Number of Road Traffic Collisions.
- Number of Road Traffic Collision Casualties (Fatal and Non-Fatal).
- Number of Water and Flood-related incidents.
- Number of Effecting Entry incidents.
- Number of Assisting other agency incidents.
- Number of Wildfires (reported under deliberate fire setting and anti-social behaviour).

Local Prevention Activity:

Community Safety Engagement:

- Road safety education targeting young drivers.
- Water safety delivered via the Community Safety Advocates.
- Representation at the PAWS group.
- Co-chairing the Moray Wildfire Summit.

Preparedness:

- Flood response training and capability development.
- Wildfire Strategy and assets implementation.

Expected Outcomes:

- Reduction in the number of Road Traffic Collisions.
- Reduction in the number of casualties resulting from Road Traffic Collisions (Fatal and Non-Fatal).
- Contributing to reducing the impact of large-scale flood events for business community and people.
- Improved resilience to climate-related incidents.

Delivering Against Strategic Objective: Safer Communities through Prevention, Safe and Effective Response, Investing in our People, Improving Performance, Innovation and Investment.

7. Community Resilience

Background:

We will work even more closely with communities and build on our success of preventing wider harm, improving wellbeing and helping communities increase their resilience by working with the Local Authority and a wide range of public and third sector partners. Critical to this is listening to and responding to communities' needs as we develop the services we provide. We will continue our commitment to Community Planning and partnership working, Nationally and Locally to improve community safety and wellbeing.

We will achieve it by:

- Strong representation and contribution at all levels within the Moray Public Protection Chief Officer Group and associated groups.
- Strong representation and contribution at all levels within the Moray Community Planning Board and associated groups.
- Strong representation and contribution at all levels within the Grampian Local Resilience Partnership.
- Supporting the development of event plans for significant events within the Moray area.

Performance Indicators:

- Attendance and contribution at Moray Public Protection Chief Officer Group and associated groups.
- Attendance and contribution at Moray Community Planning Board and associated groups.
- Attendance and contribution at Grampian Local Resilience Partnership.
- Number of referrals to partner agencies.
- Number of event plans created.
- Number of Operational Risk Visits undertaken.

Local Prevention Activity:

Community Safety Engagement:

- Adult and child safeguarding.
- Community Education.
- Youth engagement.

Preparedness:

- Robust programme of hydrant planning maintenance and inspections.
- Effective business continuity planning.
- Identify opportunities to build community resilience.

Expected Outcomes:

- Contribution to reducing the impact of mental health in the community.
- Supporting the health and wellbeing of the public.
- Contributing to the increased resilience within the community.

Delivering Against Strategic Objective: Safer Communities through Prevention, Safe and Effective Response, Investing in our People, Improving Performance, Innovation and Investment.

Review

To ensure this Local Fire and Rescue Plan remains flexible to emerging local or national priorities a review may be carried out at any time but will be reviewed at least once every three years.

A review may also be carried out if the Scottish Minister directs it or if a new Strategic Plan is approved. Following a review, the Local Senior Officer may revise the Plan.

Contact Us

We are fully committed to continually improving the service we provide to our communities and recognise that to achieve this goal we must listen and respond to the views of the public and our partners.

We use all feedback we receive to monitor our performance and incorporate this information into our planning and governance processes in order to continually improve our service. We are proud that the majority of feedback we receive is positive and we are keen to hear examples of good practice and quality service delivery that exemplifies the standards of service that we strive to provide for the communities of Scotland.
